

Fund Objective

The Meristem Growth Exchange Traded Fund is an open-ended passively managed collective investment scheme consisting of a basket of growth equity securities and designed to track the performance of selected benchmark indices with no intention to outperform the benchmarks. The Meristem Growth ETF replicates and fully tracks the Meristem Growth Index.

The ETF seeks to offer unitholders exposure to extensively researched and carefully selected growth stocks with profitable prospects. The ETF provides low tax and transaction cost advantage relative to costs associated with individual ownership and management of the listed equity securities.

Return objectives are long-term capital appreciation and dividend earnings. Profits earned are distributed to qualified unit holders in accordance with set timelines.

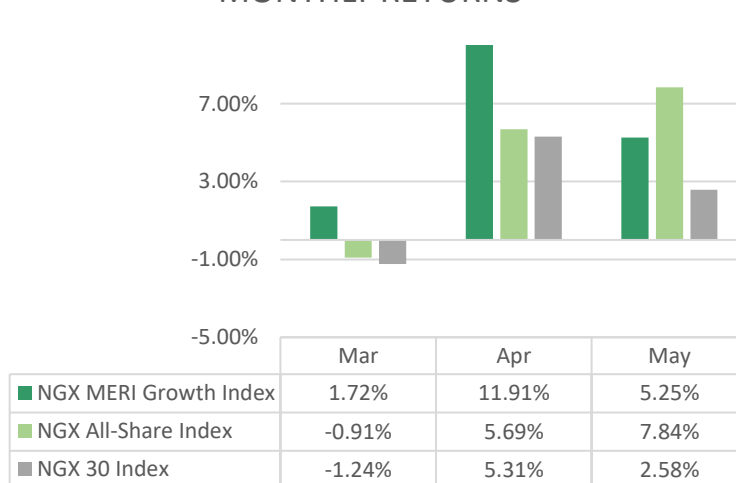

Fund Performance

In the month of May, the Growth ETF recorded a monthly performance of 2.90% MoM (vs +10.44% of the previous month) compared to its benchmark growth Index of 5.25% MoM (vs 11.91% of the previous month).

The performance of the fund was largely driven by significant stock appreciation of tickers such as OKOMUOIL (+72.50%), PRESCO (+24.98%), SEPLAT (+14.12%) and GLAXOSMITH (+14.77%). However, decline in prices of stocks in the banking and insurance sector constituent in the Fund further dragged down the performance of the Fund. This decline was influenced majorly by profit-taking activities as prices. The ETF return for the month of May consequently brings the year-to-date returns to 25.52% from 20.36% of the previous month.

MONTHLY RETURNS

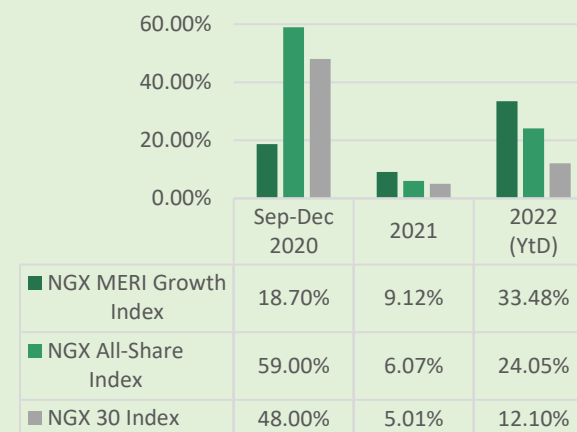

Fund Composition

The Exchange-traded fund has been structured by the Fund manager to fully replicate the weightings and performance of its benchmark index.

The index is however reviewed bi-annually and further adjusted to reflect current market realities. The ETF is thereafter rebalanced in line with the reviewed index at the bi-annual dates.

Price movement of stocks from the date the index is reviewed till the date the ETF is rebalanced however contribute to the tracking error. The variations albeit minimal, as well as expenses incurred on the fund, account for the differences in the returns of the Fund and its benchmark.

YEARLY Returns
