

Meristem Exchange Traded Funds (ETFs)

An Investment Product by Meristem Wealth Management Limited.

What are ETFs?

- A group of assets or securities that you can trade like a stock.
- Provides exposure to specific asset classes such as fixed income, commodities or equities, or to a specific style of investing.
- Tracks and replicates the performance of an index.

Meristem ETF Products

Meristem Value ETF

Stock Ticker: MERVVALUE

- A high dividend-paying ETF exposing an investor to a basket of value stocks.
- Mirrors the stock composition and return performance of the NGX-Meristem Value Index.

Meristem Growth ETF

Stock Ticker: MERGROWTH

- An ETF which provides access to a growth style of stock investing.
- Replicates the constituents and return performance of the NGX-Meristem Value Index.

Why should I invest in the Value ETF?

Access to value stocks with high historical earnings growth rate.

Constituents of the ETF trade below their intrinsic value thus providing profit opportunity.

Stocks in the ETF are generally known to pay out high dividends relative to growth stocks.

Access to stocks with projected high future earnings yield

Why should I invest in the Growth ETF?

Stocks in the ETF have potential for astronomical and sustainable revenue growth in the future

Access to stocks with potential to generate high capital gains relative to value stocks.

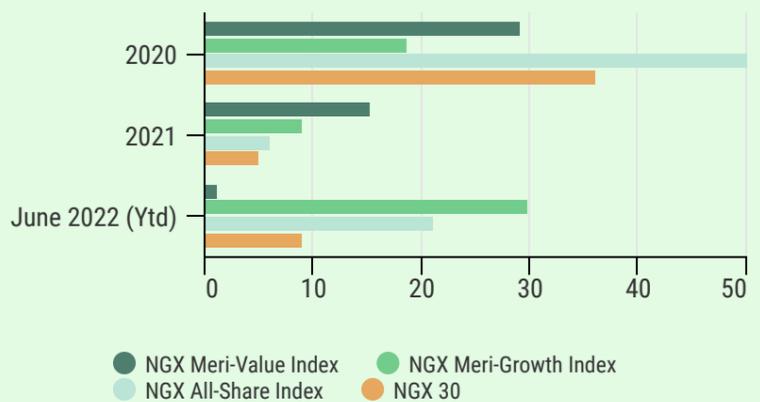

Provides steady appreciation in returns to the investor.

Growth ETF, just as the Value ETF pays out dividends to investors.
